  - Watching Emby from a console
- Change your password (Emby)

□□ Getting Started with Emby

Set up Emby for streaming from Blackbeard’s Vault. Start with your account, then choose the guide for your device.

Before you start

- Have the **Emby username and password supplied on Discord**. Contact Cruv if you need an account or cannot find your details.
- Use your supplied **server username, not your email address**. Follow the direct server sign-in steps in your device’s guide.
- Install the player app for your device. You do not need to install Emby Server.

Your streaming server

https://blackbeardsvault.com

Use the complete HTTPS address. Follow your device’s guide for the server fields and port: Roku’s setup differs from other Emby apps.

Choose your device

Device	Setup guide
Web browser / computer	Web Client Sign-In
iPhone / iPad	iOS setup
Apple TV	iOS and Apple TV guide
Android phone / tablet	Android setup

Device	Setup guide
Android TV / Google TV / NVIDIA Shield	Android and TV setup
Roku / Roku TV	Roku setup
Amazon Fire TV	Fire TV setup
LG webOS / Samsung Tizen	Smart TV setup
Xbox / PlayStation	Console support and playback options

Need the app first? See Where to Download for official app links. Availability depends on the device model, software version, and region.

Expected result: your libraries appear after sign-in. Play a short part of a title to check picture and sound.

App unlock or Premiere message

Previously purchased an app unlock? Those purchases remain grandfathered. Sign into the same app-store account used for the original purchase, using the matching app and platform. Use **Restore Purchase** if offered. Your app-store account is separate from your Emby server login.

New app unlocks are no longer available. If you need an unlock, the purchase is not recognized, or playback remains blocked by a licensing or device-limit message, contact **@Captain Cruv in #emby-support** for a Jellyfin account.

Under no circumstances should you purchase Emby Premiere.

Once Cruv supplies your Jellyfin account, follow Getting Started with Jellyfin.

After signing in

Use Home Screen Customization to arrange your libraries and home sections.

Want to use your own password? Follow Change your password (Emby). If you have forgotten it or cannot sign in, contact Cruv on Discord.

Downloads for offline viewing

The old separate downloader is deprecated. Downloads are provided through Jellyfin **upon request and approval by Cruv**. Contact Cruv on Discord to request download access and wait for approval.

Need help?

Contact **@Captain Cruv in #emby-support** on Discord. Include your device model, app version, the exact error, and when it happened. Never post your password.

Where to Download

Choose the Emby app for your device, then open the matching Blackbeard’s Vault sign-in guide.

Before you start

Have your server account details from Discord ready. Install a player app; you do not need Emby Server.

Supported devices and setup guides

These are the device families covered by Blackbeard’s Vault support. Store availability depends on model, software version, and region.

Device	Official app	Setup
Amazon Fire TV	Download / store link	Sign-in guide
Android phone / tablet	Download / store link	Sign-in guide
Android TV / Google TV	Download / store link	Sign-in guide
NVIDIA Shield	Download / store link	Sign-in guide
Apple TV	Download / store link	Sign-in guide
iPhone / iPad	Download / store link	Sign-in guide
LG webOS	Download / store link	Sign-in guide
Samsung Tizen	Download / store link	Sign-in guide
Roku / Roku TV	Download / store link	Sign-in guide

Chromecast receives playback cast from a compatible phone or web client; it is different from a Chromecast with Google TV, which can run a TV app.

For a computer, use the web client. See console options before trying Xbox or PlayStation.

Blackbeard’s Vault membership page — for membership information. Contact Cruv in your Discord server for support.

Playback access

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Need an unlock, or seeing “Premiere Device Limit Exceeded”? Contact **@Captain Cruv** in **#emby-support** for a **Jellyfin account**. **Do not buy an app unlock or Emby Premiere.** Once Cruv has provided your account, follow Getting Started with Jellyfin.

If you cannot find the app

Check the official download link and your device’s app store. Send Cruv the exact model and operating-system version if the app is unavailable.

Contact **@Captain Cruv** in **#emby-support** on Discord. Include your device, app version, exact error, and when it happened. Never post your password.

Technical guidance reviewed September 2026. Store availability and interface labels can change.

Web Client

Sign in through your browser and arrange your personal Emby home screen.

Web Client Sign-In

Sign in to Blackbeard’s Vault from a computer, phone, or tablet using a current web browser.

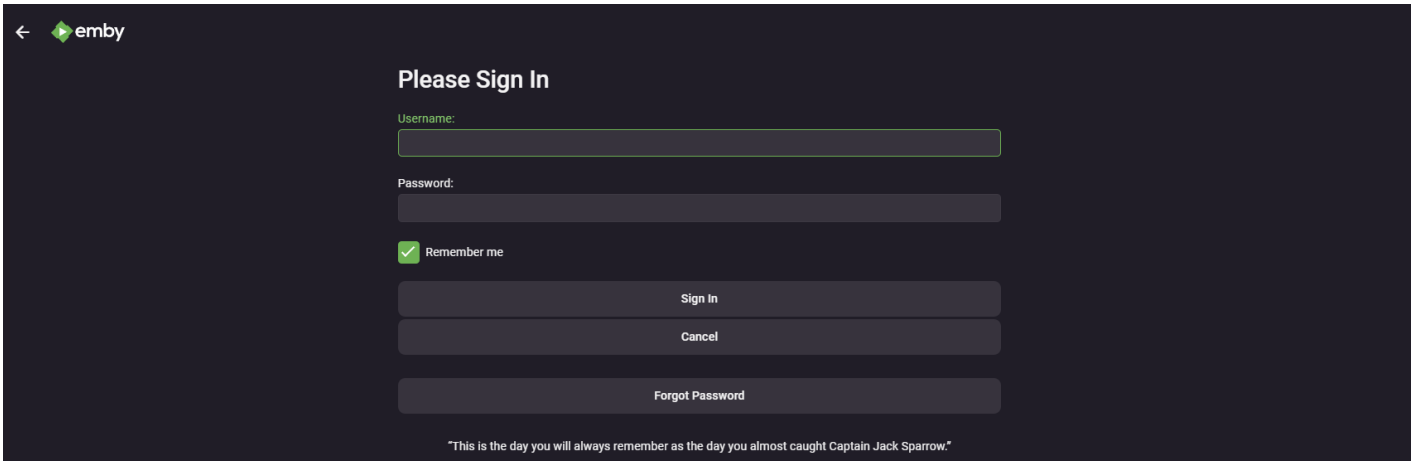

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Sign in

1. Open https://blackbeardsvault.com. **Keep the s in https://** when typing the address.
2. If a profile list appears, choose **Manual Login**. Enter your Discord-issued **Username** and **Password**. **Your username is case-sensitive:** match the capital and lowercase letters exactly.
3. Use **Remember me** only on your own device, then select **Sign In**.

Expected result: your Emby home screen shows the libraries available to your account.

Sign-in screen from the existing guide; appearance may vary by version.

Next steps

Bookmark the site with **Ctrl+D** on Windows or **Command+D** on Mac. Follow Home Screen Customization to arrange your home page.

Want to use your own password? Follow Change your password (Emby). If you have forgotten it or cannot sign in, contact Cruv on Discord.

Troubleshooting

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Need an unlock, or seeing "Premiere Device Limit Exceeded"? Contact **@Captain Cruv** in **#emby-support** for a **Jellyfin account**. **Do not buy an app unlock or Emby Premiere.** Once Cruv has provided your account, follow Getting Started with Jellyfin.

- **Cannot reach the server:** copy `https://blackbeardsvault.com` exactly and try the web client.
- **Sign-in rejected:** check your username and password for extra spaces. Use the server login, not Emby Connect. Ask for account help if it still fails.
- **Playback or licensing error:** update the app, try another title, and report the exact message to support.

Contact **@Captain Cruv** in **#emby-support** on Discord. Include your device, app version, exact error, and when it happened. Never post your password.

Emby web client · Server accounts and Emby Connect

Technical guidance reviewed September 2026. Store availability and interface labels can change.

Web Client

Home Screen Customization

Arrange your Emby web home screen so the items you use most are easy to find. These are personal display preferences.

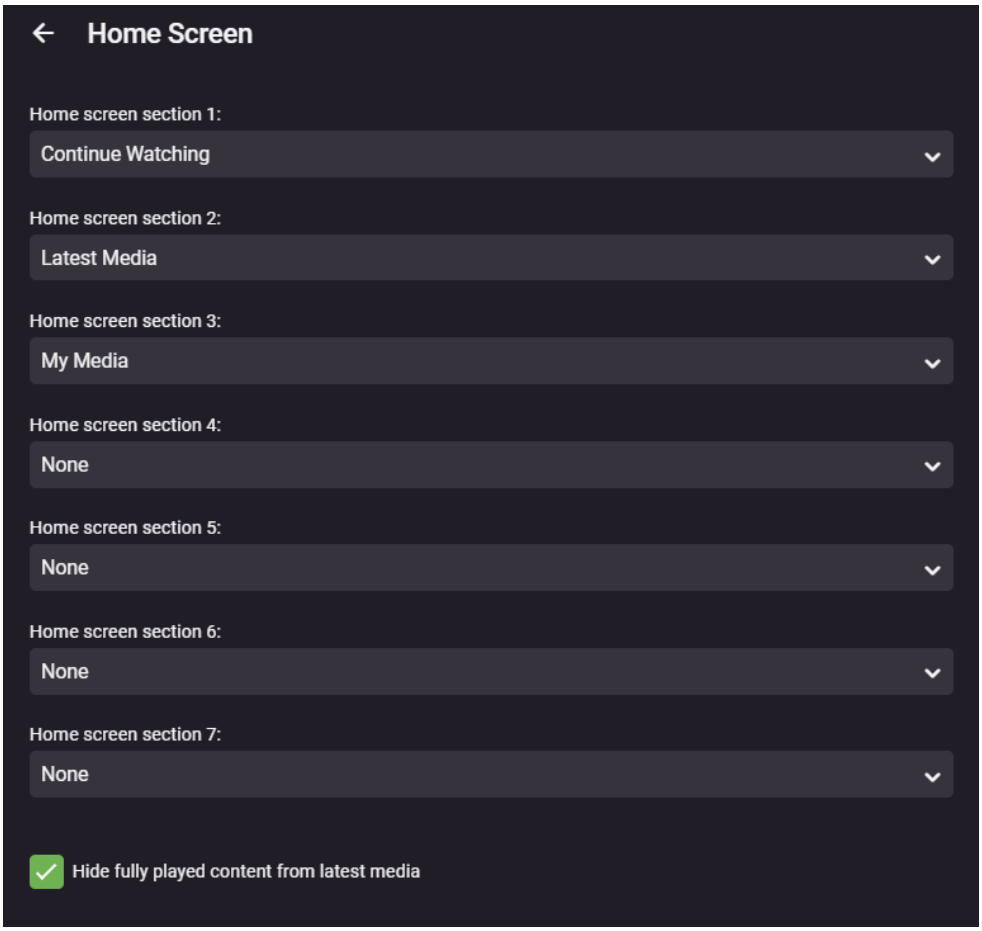

Before you start

Sign in at https://blackbeardsvault.com. This guide uses the web client; app versions can have different section controls.

Customize the home screen

1. Open your **profile menu** at the top right, then choose **App Settings**. Some versions show a gear icon.
2. Choose **Home Screen**.
3. Arrange the home sections in this order where those controls are available: **Continue Watching**, **Latest Media**, then **My Media**. Set unused sections to **None** if your version uses numbered section menus.
4. Enable **Hide fully played content from latest media** if you prefer to see only unwatched additions. Use **Library Order** to put your most-used libraries first.
5. Save if the screen provides a save button, then return to Home and check the result.

Expected result: in-progress titles appear first, followed by new additions and your library shortcuts. Pick a different order if it suits you better.

Example from the existing guide. Newer Emby versions may use a different section editor; the suggested order is the same.

Troubleshooting

If a label or option is missing, check the equivalent Home Screen controls in your current app. Available sections depend on the libraries your account can access. Refresh Home after changing settings; some preferences are specific to the client.

Contact **@Captain Cruv** in **#emby-support** on Discord. Include your device, app version, exact error, and when it happened. Never post your password.

iOS Apps

Set up Emby on iPhone, iPad, and Apple TV, with separate playback-access guidance.

iOS App Sign-In and unlock

Set up Emby on an iPhone, iPad, or Apple TV.

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Install Emby

Install Emby for iPhone and iPad from the App Store, or Emby for Apple TV from the tvOS App Store. Check compatibility on your device.

Connect and sign in

1. Open Emby. If it offers **Emby Connect**, choose **Skip** or the option to connect manually. Menu wording varies by app version.
2. Choose **Add Server** if needed. In **Host** or the server-address field, enter `https://blackbeardsvault.com`. Keep `https://` and add no extra port or path.
3. If the app shows a separate **Port** field, leave it **blank**, then choose **Connect** or **Connect to Server**.
4. Choose **Manual Login** if offered. Enter the **Username** and **Password** supplied on Discord, then select **Sign In**.

Expected result: the home screen shows your available libraries. Play a short part of a title to check the setup.

Emby Connect is optional and uses a separately linked Connect account. Your supplied server username and password belong on the server sign-in screen.

Playback access

Apple TV has free full playback. iPhone/iPad playback can depend on server Premiere; if it is blocked, contact Cruv for Jellyfin.

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Need an unlock, or seeing "Premiere Device Limit Exceeded"? Contact **@Captain Cruv** in **#emby-support** for a **Jellyfin account**. **Do not buy an app unlock or Emby Premiere.** Once Cruv has provided your account, follow Getting Started with Jellyfin.

Troubleshooting

- **Cannot reach the server:** copy `https://blackbeardsvault.com` exactly and try the web client.
- **Sign-in rejected:** check your username and password for extra spaces. Use the server login, not Emby Connect. Ask for account help if it still fails.
- **Playback or licensing error:** update the app, try another title, and report the exact message to support.

Contact **@Captain Cruv** in **#emby-support** on Discord. Include your device, app version, exact error, and when it happened. Never post your password.

Roku App

Install Emby on Roku and connect using the Blackbeard’s Vault Host and Port settings.

Roku App Sign-In

Connect Emby on a Roku streaming player or Roku TV.

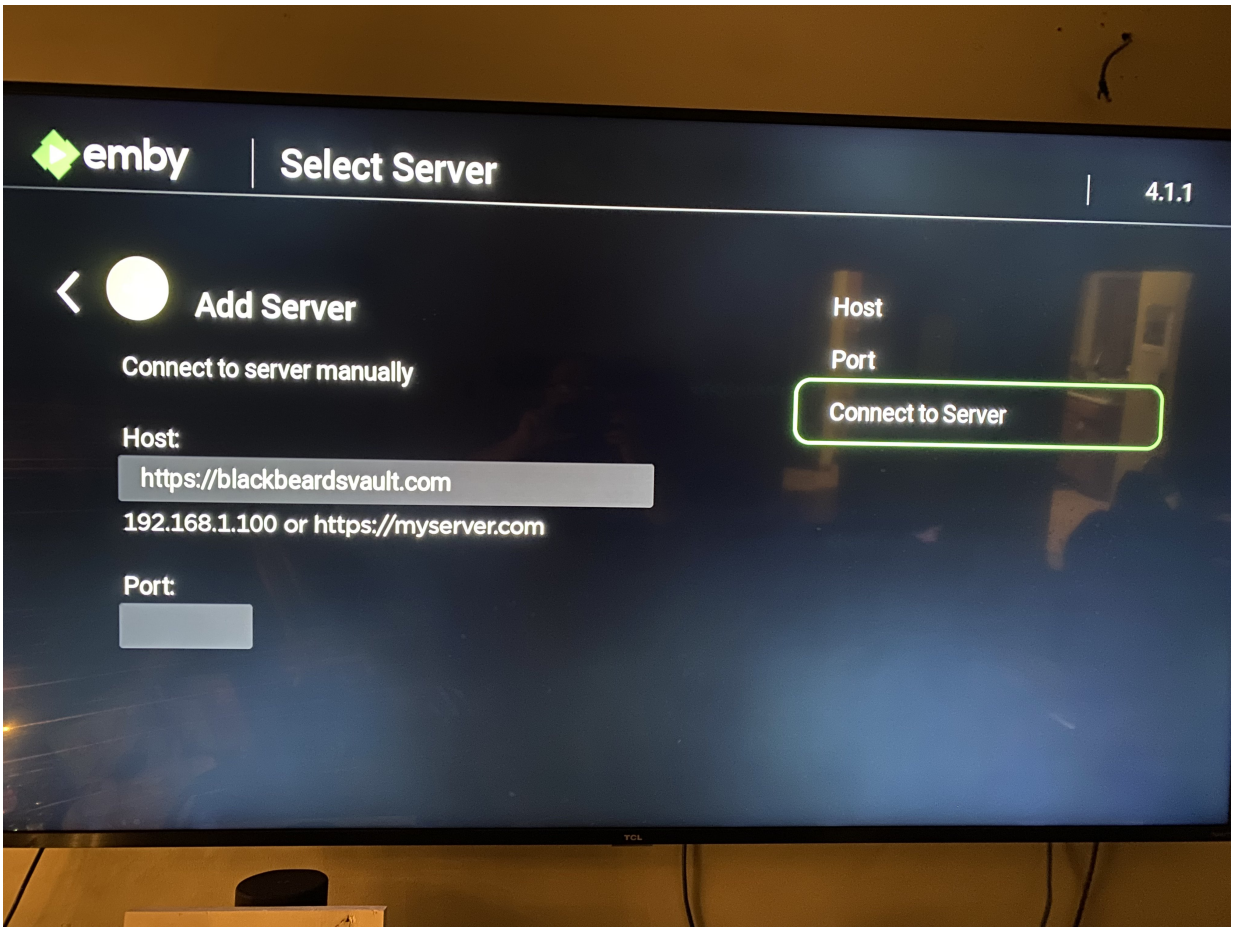

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Install and sign in

1. Search Roku's **Streaming Store** for **Emby** and add it. The official Roku page links to the correct app.
2. Open Emby and choose the manual server connection option if Emby Connect is offered.
3. Enter **Host**: `https://blackbeardsvault.com`.
4. Enter **Port**: `0`, then choose **Connect to Server**. On this Roku form, 0 prevents an extra port being appended to the HTTPS address.
5. Choose **Manual Login**. Enter your Discord-issued **Username** and **Password**, then sign in.

Expected result: your Emby home screen appears. Roku full playback is free; no playback app unlock is required.

Roku connection form from the existing guide. Use the Host and Port values written above.

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Need an unlock, or seeing "Premiere Device Limit Exceeded"? Contact **@Captain Cruv** in **#emby-support** for a **Jellyfin account**. **Do not buy an app unlock or Emby Premiere.** Once Cruv has provided your account, follow Getting Started with Jellyfin.

Emby playback requirements · Emby Roku developer guidance on Port 0

Technical guidance reviewed September 2026. Store availability and interface labels can change.

Amazon Fire TV

Install Emby on compatible Fire TV devices and resolve sign-in or playback-access issues.

Amazon Fire TV sign in and app unlock

Set up Emby on a compatible Amazon Fire TV or Fire TV Stick.

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Install Emby

Search the Amazon Appstore on your device for **Emby** and install it. Use Emby's Fire TV page for the official listing. If it is unavailable, check the exact device model with support.

Connect and sign in

1. Open Emby. If it offers **Emby Connect**, choose **Skip** or the option to connect manually. Menu wording varies by app version.
2. Choose **Add Server** if needed. In **Host** or the server-address field, enter `https://blackbeardsvault.com`. Keep `https://` and add no extra port or path.
3. If the app shows a separate **Port** field, leave it **blank**, then choose **Connect** or **Connect to Server**.

4. Choose **Manual Login** if offered. Enter the **Username** and **Password** supplied on Discord, then select **Sign In**.

Expected result: the home screen shows your available libraries. Play a short part of a title to check the setup.

Emby Connect is optional and uses a separately linked Connect account. Your supplied server username and password belong on the server sign-in screen.

Playback access

TV playback rules differ by platform. LG, Samsung, Roku, and Apple TV have free full playback in Emby's current feature matrix. Android TV / Google TV and Fire TV have a server-wide free-device allowance; a license-limit message is not proof that a trial expired.

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Need an unlock, or seeing "Premiere Device Limit Exceeded"? Contact **@Captain Cruv** in **#emby-support** for a **Jellyfin account**. **Do not buy an app unlock or Emby Premiere.** Once Cruv has provided your account, follow Getting Started with Jellyfin.

Android

Set up Emby on Android phones, tablets, Android TV, and Google TV.

Android app sign in and unlock

Set up Emby on an Android phone, tablet, Android TV, or Google TV device.

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Install Emby

Install Emby through the official Android download page. For a television, choose the TV-compatible client listed by Emby for Android TV; NVIDIA Shield and Google TV belong to this group.

Connect and sign in

1. Open Emby. If it offers **Emby Connect**, choose **Skip** or the option to connect manually. Menu wording varies by app version.
2. Choose **Add Server** if needed. In **Host** or the server-address field, enter `https://blackbeardsvault.com`. Keep `https://` and add no extra port or path.
3. If the app shows a separate **Port** field, leave it **blank**, then choose **Connect** or **Connect to Server**.

4. Choose **Manual Login** if offered. Enter the **Username** and **Password** supplied on Discord, then select **Sign In**.

Expected result: the home screen shows your available libraries. Play a short part of a title to check the setup.

Emby Connect is optional and uses a separately linked Connect account. Your supplied server username and password belong on the server sign-in screen.

Playback access

Playback access can depend on your app and the server's Premiere device allowance. If the app blocks playback or asks for payment, use the Jellyfin route below.

TV playback rules differ by platform. LG, Samsung, Roku, and Apple TV have free full playback in Emby's current feature matrix. Android TV / Google TV and Fire TV have a server-wide free-device allowance; a license-limit message is not proof that a trial expired.

Already bought an app unlock in the past? Emby honors those previous purchases. Smart TV Apps

Set up Emby on LG webOS, Samsung Tizen, Android TV, and Google TV. Includes sign-in steps and help with playback access.

Smart TV App sign in and app unlock

Connect an LG, Samsung, Android TV, or Google TV television to Blackbeard’s Vault.

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Install Emby

TV system	Install the app
LG webOS	Emby for LG through the TV’s app store.
Samsung Tizen	Emby for Samsung through Samsung Apps where available.
Android TV / Google TV	Emby for Android TV through Google Play.

Availability depends on TV model and region. For a Roku TV, follow Roku App Sign-In; for Fire TV, use the Fire TV guide.

Connect and sign in

1. Open Emby. If it offers **Emby Connect**, choose **Skip** or the option to connect manually. Menu wording varies by app version.
2. Choose **Add Server** if needed. In **Host** or the server-address field, enter `https://blackbeardsvault.com`. Keep `https://` and add no extra port or path.
3. If the app shows a separate **Port** field, leave it **blank**, then choose **Connect** or **Connect to Server**.
4. Choose **Manual Login** if offered. Enter the **Username** and **Password** supplied on Discord, then select **Sign In**.

Expected result: the home screen shows your available libraries. Play a short part of a title to check the setup.

Emby Connect is optional and uses a separately linked Connect account. Your supplied server username and password belong on the server sign-in screen.

Playback access

TV playback rules differ by platform. LG, Samsung, Roku, and Apple TV have free full playback in Emby's current feature matrix. Android TV / Google TV and Fire TV have a server-wide free-device allowance; a license-limit message is not proof that a trial expired.

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Emby playback and Premiere requirements · Emby Connect explained

Technical guidance reviewed September 2026. Store availability and interface labels can change.

Xbox and Playstation Apps

Check Emby support for Xbox and PlayStation, then choose an available playback option.

Watching Emby from a console

Choose a supported way to watch Emby on an Xbox or PlayStation console. Availability and playback access depend on the console.

Before you start

- Have the **username and password supplied after signing up on Discord**. Use your username, not your email.
- Connect your device to the internet.

Xbox One and Xbox Series X/S

1. Install Emby from the Microsoft Store using Emby's Xbox page to identify the official app.
2. Open the app and connect manually to `https://blackbeardsvault.com`. Use your Discord-issued server username and password.
3. Try a title. Native Xbox playback requires server Premiere; if access is blocked, contact Cruv for Jellyfin instead of purchasing anything.

PlayStation

PS4: Emby documents a browser client, not a native PlayStation app. Open the PS4 **Internet Browser** at https://tv.emby.media, connect to `https://blackbeardsvault.com`, and use your server credentials. Emby lists Premiere as required for this TV interface.

PS5: do not follow the PS4 browser instructions; PS5 has no dedicated web-browser app. Use a supported TV app, streaming device, phone, or computer instead.

If playback is blocked

Already bought an app unlock in the past? Emby honors those previous purchases. Sign in to the same Apple, Google, or Amazon store account that originally bought the unlock, using the matching app/platform. Use **Restore Purchase** if the app offers it. If the purchase is not recognized, contact Cruv. New app unlocks are no longer the route for access. **Never purchase Emby Premiere.**

Need an unlock, or seeing "Premiere Device Limit Exceeded"? Contact **@Captain Cruv** in **#emby-support** for a **Jellyfin account**. **Do not buy an app unlock or Emby Premiere.** Once Cruv has provided your account, follow Getting Started with Jellyfin.

A Jellyfin account also needs a compatible client. See Jellyfin apps by platform before choosing a device.

Troubleshooting

- **Cannot reach the server:** copy `https://blackbeardsvault.com` exactly and try the web client.
- **Sign-in rejected:** check your username and password for extra spaces. Use the server login, not Emby Connect. Ask for account help if it still fails.
- **Playback or licensing error:** update the app, try another title, and report the exact message to support.

Contact **@Captain Cruv** in **#emby-support** on Discord. Include your device, app version, exact error, and when it happened. Never post your password.

Technical guidance reviewed September 2026. Store availability and interface labels can change.

Change your password (Emby)

EMBY · ACCOUNT HELP

Change your password using a web browser on your phone or computer, even if you normally watch in a TV or mobile app.

1. Open Emby

https://blackbeardsvault.com

> **Keep the s in https://**. Copy the whole address exactly.

Already signed in? Continue to step 2. Otherwise, sign in with your **Emby username and current password**.

> **Your username is case-sensitive.** Match the capital and lowercase letters exactly as Cruv sent them. Use your server username, not your email address.

2. Open your profile

Select your **user/avatar icon in the top-right corner** (labelled **Settings**), then choose **App Settings**.

Under **your username's Preferences**, choose **Profile**. Find the **Password** section.

3. Save your new password

Enter the password you want in **New password**. Type it again in **New password confirm**. If your version also asks for **Current password**, enter the password you use now.

Choose a strong, unique password and select **Save Password**. Wait for confirmation that it saved.

> Your username stays the same. If an app asks you to sign in again, use your **new Emby server password**.

Forgot your password or stuck?

Contact **@Captain Cruv on Discord** if you cannot sign in, the password controls are missing, or the change will not save. **Never send or post your current or new password.**

Profile missing? Emby can hide it when your account is not allowed to edit its password. Cruv can help.

Which password does this change?

This changes your account password on **Blackbeard’s Vault Emby**. It does not change your Jellyfin password, app-store password, or **Emby Connect** password.

The separate **Profile PIN** is an optional four-digit code for shared devices. Use the **Password** section above to change your server password.

If you use Emby Connect and have forgotten that separate password, use Emby Connect password recovery.

Back to Getting Started with Emby

Verified instructions and sources

The menu path and field names were checked in Blackbeard’s Vault Emby Web 4.10.1.0 and against Emby’s official documentation. Older apps may label this area Password; use the browser route above for these steps.

Emby Profile · Passwords and PINs · Profile permissions

Checked 20 October 2026.
