

Android Apps

A guide on how to setup Jellyfin on Android and Android TV devices

- [📱 Android \(mobile\) sign-in](#)
- [📺 Android TV & Google TV sign-in \(Jellyfin\)](#)

? Android (mobile) sign-in

For: Android phones and tablets.

? Before you start

- **Be sure you are an active member on the Discord.** No subscription or in-app unlock is required beyond that.
- Install **Streamyfin** from Google Play (or APK if preferred).

Suggested app(s) for this platform

- **Recommended:** Streamyfin. [See details](#)
- **Alternative:** Jellyfin (official mobile app). [See details](#)

? Connect Streamyfin to our server

1. Open Streamyfin. If you see an intro screen, tap **Skip**.
2. Tap **Add Server** or **Enter Manually**.
3. In **Host**, type this address exactly:

```
https://jellyfin.blackbeardsvault.com
```

4. Leave **Port** blank, then tap **Connect**.
5. At **Sign In**, enter the **Username** and **Password** you received on Discord, then tap **Sign In**. You can enable **Remember me**.

Important:

- Use `https` with the **s**.
- Do not add a trailing `/`.
- Use your **Username**, not your email.

? Troubleshooting

☐ **Quick Connect:** If it appears, ignore it and use the server address above.

☐ **Old server saved:** Remove old server entries or reinstall the app, then add ours again.

? Android TV & Google TV sign-in (Jellyfin)

For: Chromecast with Google TV, Nvidia Shield, Onn/Hisense/TCL Android TVs, and other Android TV devices.

? Before you start

- **Be sure you are an active member on the Discord.** No subscription or in-app unlock is required beyond that.
- Open the **Google Play Store** on your TV and install your preferred app.

Suggested app(s) for this platform

- **Recommended:** Jellyfin for Android TV. [See details](#)
- **Alternative:** Kodi + Jellyfin add-on. Good on older devices or if you already use Kodi. [See details](#)

Heads-up: Streamyfin is for phones and tablets. It is not available on Android TV or Google TV.

? Connect the app to our server

1. Open the **Jellyfin for Android TV** app.
2. Select **Add Server** or **Enter Manually**.
3. In the server field, type this address exactly:

```
https://jellyfin.blackbeardsvault.com
```

4. Leave **Port** blank, then choose **Connect**.
5. Sign in with the **Username** and **Password** you received on Discord.

Important:

- Use `https` with the `s`.
- Do not add a trailing `/`
- Use your **Username**, not your email.

? Troubleshooting

☐ **Quick Connect:** If it appears, ignore it and use the server address above.

☐ **Old server saved:** Remove old server entries or reinstall the app, then add our server again.
