

# iOS Apps

A guide on how to setup Jellyfin on iPhones, iPads, and Apple TV

- [📱 iOS app sign-in \(Jellyfin\)](#)

# 📱 iOS app sign-in (Jellyfin)

For: iPhone and iPad.

## 📌 Before you start

- **Be sure you are an active member on the Discord.** No subscription or in-app unlock is required beyond that.
- Install the app you prefer. If you need suggestions: *(see panel below)*

### Suggested app(s) for this platform

- **Recommended:** Streamyfin. [See details](#)
- **Alternative:** Swiftfin (official iOS client). [See details](#)

**Heads-up:** Official Jellyfin clients are free. Paid apps exist, but you do not need one for basic use.

## 📱 Connect the app to our server

1. Open your chosen app. If you see an intro screen, tap **Skip**.
2. Tap **Add Server** or **Enter Manually**.
3. In **Host**, type this address exactly:

```
https://jellyfin.blackbeardsvault.com
```

4. Leave **Port** blank, then tap **Connect**.
5. At **Sign In**, enter the **Username** and **Password** you received on Discord, then tap **Sign In**. You can turn on **Remember me**.

**Important:**

- Use `https` with the `s`.
- Do not add a trailing `/`.
- Use your **Username**, not your email.

---

## ☐☐ Troubleshooting

☐ **Quick Connect:** If it pops up, ignore it and use the server address above.

☐ **Old server saved:** Remove old servers or reinstall the app, then add ours again.

---
