

? Samsung TV sign-in (Jellyfin)

For: Samsung Smart TVs running Tizen.

? Before you start

- **Be sure you are an active member on the Discord.**
- Open the Samsung **Apps** store and install **Jellyfin** (if available on your model/region).

Suggested app(s) for this platform

- **Recommended:** Jellyfin for Tizen (availability varies). [See details](#)
- **Alternative:** Use an external streamer (Roku, Fire TV, Google TV) for the most consistent experience. [See details](#)

Heads-up: Store availability can vary by TV model and region. If you don't see Jellyfin, an external device is the easiest path.

? Connect the app to our server

1. Open Jellyfin on your TV.
2. Select **Add Server** or **Enter Manually**.
3. In the server field, type this address exactly:

```
https://jellyfin.blackbeardsvault.com
```

4. Leave **Port** blank, then choose **Connect**.
5. Sign in with the **Username** and **Password** you received on Discord.

Important: Use `https` (with the `s`) and do not add a trailing `/`.

? Troubleshooting

App missing? Use a streaming device (Roku, Fire TV, Google TV) and follow the matching guide.

Old server saved: Remove old server entries, then add ours again.
