

Deathwing draft color notes

Keep Light Earth as the main visible armor color, with a slightly darker base and Ivory edges.

Armor

1. **Darker base:** AK 3GEN Decomposed Flesh (AK11058).
2. **Main armor:** AK 3GEN Light Earth (AK11115), leaving Decomposed Flesh in sheltered areas.
3. **Edge highlights:** AK 3GEN Ivory (AK11004).

Deck Tan (AK11114) remains a possible alternative for the lightest color; Ivory is the selected highlight. The armor recess shade is still undecided.

Finish

Pure AK Ultra Matte is the default, using two thin, consistent coverage coats. Satin is optional. Any optional metallic restoration or accents follow all varnishing and remain unvarnished.

Still to choose

The recess-shade product and application, color placement on robes and heraldry, and which shared Dark Angels detail recipes to carry across.
